

**AMENDMENTS TO THE SPECIFICATION:**

Kindly amend the specification as follows:

On page 11, rewrite the paragraph that begins on line 1 as follows:

A dispersion of an alkylalkoxysilane and a ~~fluoropolymer~~ fluoropolymer in water has proven to be a particularly advantageous water proofer, such as the one distributed by the name of Wacker BS29 (0142200) from the company Wacker Chemie GmbH. Another product called Wacker BS 28 can be used as well, however, it is less well suited.
